

MOVEMBER®

2016 - 2021 INVESTMENT REPORT

DISTINGUISHED GENTLEMEN'S FUND

A LETTER FROM THE CEO OF MOVEMBER

Since 2012, tens of thousands of men and women around the world have taken part in the annual Distinguished Gentleman's Events.

Founded in Sydney, by Mark Hawwa, the ride has become a global phenomenon in celebrating the art of looking dapper and connecting communities of riders together.

The idea was born out of the belief that you can bring people together to do something they love and unite them around a cause at the same time.

Over the last decade, we have watched this event grow from strength to strength and Movember has been privileged to be DGR's official charity partner since 2016.

In May 2021, the world was still in the grip of the COVID-19 pandemic. But despite the restrictions still in place on social events in many countries, our dedicated DGR community were still determined to continue the ride, albeit in a safe and socially distanced way.

Riding solo was a way of complying with local social distancing restrictions around the world while still enabling our community to come together and support each other.

Riders from 116 countries turned out in May to raise AUD \$4,315,463 and awareness of prostate cancer and men's mental health. That's an incredible achievement.

This year, as we celebrate the continuation of our partnership with the Distinguished Gentleman's Ride for another five years, we're excited about being able to implement programs aimed at improving the health and wellbeing of men around the world.

Movember is working towards a world where men of all ages understand what mental health is, what they need to do to manage their wellbeing and feel comfortable asking for support when they need it.

The support of our DGR community will help us to further develop our Global Cancer Real World Evidence Network, which will fast track efforts to improve the treatment and care of men living with prostate cancer, which, in turn, enables them to enjoy healthier, happier, longer lives.

A handwritten signature in black ink, appearing to read 'M Terry'.

MICHELLE TERRY
CEO, MOVEMBER

THE DISTINGUISHED GENTLEMAN'S FUND

THE DISTINGUISHED GENTLEMAN'S FUND

Café Racer Aficionado Pty Ltd has partnered with Movember to manage program investments using funds raised from the Distinguished Gentlemen's Ride (DGR) and Distinguished Gentlemen's Drive (DGD), which make up the Distinguished Gentlemen's Fund. This report outlines the allocation of net proceeds from the **2016, 2017, 2018, 2019, 2020, and 2021** Campaigns.

Note: In some cases, details of final projects to be funded will not be determined until later in 2022 as a result of those projects being subject to an independent peer review process.

INVESTMENT OVERVIEW

Net funds of **\$4,315,463** were raised through the 2021 ride, with a total of **AUD \$28,553,291** cumulatively raised from the 2016, 2017, 2018, 2019, 2020, and 2021 Distinguished Gentlemen's Events and invested in men's health programs globally. Appendix A is a list of the funded programs.

The following chapters of this report provides a brief overview of programs and projects funded by the Distinguished Gentlemen's Fund.

INTER- NATIONAL PROJECTS

INTERNATIONAL PROJECTS

PROSTATE CANCER SURVIVORSHIP

TRUE NORTH DIGITAL HEALTH

Movember's True North Digital health resource empowers men who are living with prostate cancer to take control of their health and points them toward resources that improve their quality of life.

Following a successful pilot of a web-based tool that allowed men to keep track of symptoms and side effects of prostate cancer treatment, Movember is now scaling the resources that were shown to be effective.

The True North informational website is now available in the UK, Ireland, Australia, New Zealand, the USA and Canada. Each region has had extensive review by clinical experts for accuracy and relevance to local practice as well as any required language and cultural translations. More than 54,000 users have visited True North since it was launched, with 4 out of every 5 visitors reporting feeling more informed after their visit.

As well as providing information in digestible and engaging ways, men participating in clinical registries can track their symptoms using a set of surveys that assess urinary, sexual, hormonal, bowel and mental health side effects. It captures how they are feeling about their prostate cancer and how confident they are in the healthcare they are receiving.

Once the assessments have been completed, men are provided with a set of personalized tips and recommendations for how to improve their quality of life. They will also have the ability to track and see their PSA levels over time. Experiences and recommendations from other men with prostate cancer are also shared in written and video form.

Who is delivering it?

The program pilot was originally delivered by the University of Washington through the True North US (formerly TrueNTH) pilot website. This work is now being directly managed by Movember to be delivered and scaled in Australia, Canada, UK, Ireland, New Zealand and the US.

How much funding has been invested?

Full details of funding for this project can be found in the Australia, Canada, UK, US and Rest of World country sections below.

TRUE NORTH SEXUAL HEALTH PROJECT

Sexual dysfunction can have a huge impact on quality of life following prostate cancer treatment – it can lead to anxiety, depression and contribute to the breakdown of relationships. Empowering men to understand how to navigate and redefine sex and intimacy after their diagnosis is critical to improving quality of life.

Following a successful pilot project, Movember is developing web-based services that will support men and their partners to self-manage and communicate about sexual health, an international health professional education program and deliver the International Clinical Practices for Sexual Health Care in Prostate Cancer Survivorship: Movember Guideline. It was decided that any patient-facing guidance derived from the clinical care guideline would be incorporated into the self-management web-based tool.

Who is delivering it?

Movember has established a working group (US, Canada, Italy, Netherlands, China, Kenya, UK, Australia, New Zealand) for True North international sexual health guidelines who contribute to and will be delivering this project. The international digital resource will be delivered by Movember in 2022.

How much funding has been invested?

Full details of funding for this project can be found in the Australia and Canada country sections below.

PROSTATE CANCER CLINICAL QUALITY

TRUE NORTH GLOBAL REGISTRY

The True North Global Registry supports clinicians and researchers across 13 Movember countries (Australia, Austria, Canada, Czech Republic, Germany, Hong Kong, Italy, Netherlands, New Zealand, Spain, Switzerland, UK, US) to participate in an international project that aims to improve the physical and mental health of men with prostate cancer.

As of September 2021, there were 75,019 men with clinical data in the registry internationally. Harnessing new and existing prostate cancer registries and organisations, which are systematically collecting clinical data and measuring patient reported outcomes at both baseline and 12 months post active treatment, this clinical quality initiative seeks to improve patient outcomes by reducing variation in treatment quality,

identifying excellence, and providing risk adjusted outcomes data to physicians.

By leveraging the International Consortium for Health Outcomes Measurement (ICHOM) standard set for localised prostate cancer, the project aims to:

- Define relevant clinical and demographic features, quality metrics, and patient outcome measures collected for men with localised prostate cancer who are managed in each of the Participating Sites or Local Data Centres where patients' data are collected
- Describe international patterns of presentation, care, and patient-reported outcomes for men diagnosed with localised prostate cancer
- Establish a secured and collaboratively governed

central data repository drawn from Participating Sites and Local Data Centres who contribute patient-level data on patterns of presentation, care, quality, and patient reported outcomes

- Systematically measure other key elements of care that have the potential to impact outcomes
- Compare and share outcomes between participating sites
- Analyse the variations in outcomes – to understand the key drivers that deliver the best possible outcomes

Funds raised across the international community have supported and continue to support the following Local Data Centres and their participating sites:

MOVEMBER COUNTRIES	PARTICIPATING RESEARCH ORGANISATIONS
Australia	Monash University, Alfred Health, Australian Urology Associates, The Garvan Institute of Medical Research, Queensland University of Technology
Austria	MediUniWien
Canada	University Health Network – Princess Margaret Hospital, Vancouver Prostate Centre, University of Alberta/APCaRI
Czech Republic	Thomayer Hospital
Germany / Switzerland	German Cancer Society
Hong Kong	Prince of Wales Hospital
Italy	Fondazione IRCCS Istituto Nazionale dei Tumori, University of Naples Federico II, IRCCS Ospedale San Raffaele
Netherlands	Santeon
New Zealand	Centre for Health Outcome Measures (CHOMNZ)
Spain	Hospital del Mar Research Institute (IMIM)
United Kingdom	University of Southampton, University College London
United States	Michigan Urological Surgery Improvement Collaborative (MUSIC), UCLA Urology, Vanderbilt University Medical Centre, Beth Israel Deaconess Medical Centre, Sloan Kettering Institute for Cancer Research

Who is delivering it?

Movember is directly funding and overseeing the project. Monash University and the University of California Los Angeles (UCLA) are the joint coordinating centres. A complete list of participating countries is listed above.

How much funding has been invested?

Full details of funding for this project can be found in the Australia, UK and Rest of World country sections below.

IRONMAN - AN INTERNATIONAL REGISTRY FOR MEN WITH ADVANCED PROSTATE CANCER

IRONMAN is an international population-based registry of 5,000 men with advanced prostate cancer. It seeks to improve clinical outcomes and quality of life for men with advanced prostate cancer. Currently operating across 107 active sites in 11 countries,¹ the IRONMAN project, aims to:

- describe real world practice patterns for six new treatments internationally
- identify treatment sequences or combinations associated with optimal survival and patient-reported outcomes
- assess whether treatments are associated with toxicities and co-morbidities
- develop prospective blood biobank for clinical and biological characterization of disease subtypes
- create international partnership to work together to identify unmet needs in advanced prostate cancer

IRONMAN commenced in January 2017. Funds raised from the DGR 2017 in the United Kingdom and Europe have been allocated to support the implementation of the project in the UK and across Europe.

Recruitment of all 5,000 patients is expected to be achieved by end of 2025. A total of 2,456 patients have been recruited to the study as of February 22, 2022.

Who is delivering it?

Movember is one of the key funders of the program and is overseeing the contracting for all of the non-US sites. The Prostate Cancer Clinical Trials Consortium (PCCTC) in the US is the global data coordination centre for the project.

How much funding has been invested?

Full details of funding for this project can be found in the US, UK and Rest of World sections below.

IRONMAN EMPRO SUB STUDY

The IRONMAN EMPRO (Engaging Men in Patient Reported Outcomes) sub-study aims to test the concept that using PROMs (Patient Reported Outcome Measures) to trigger clinical intervention for men with advanced prostate cancer can improve quality of life.

Up to 180 men who are participating in the global IRONMAN study will be recruited to take part in the EMPRO sub-study. The men will be asked to complete a short monthly online questionnaire, with questions focusing on anxiety, depression, pain, fatigue, social isolation and insomnia.

If the man's responses to the questionnaire indicate that he is in distress or that his symptoms are worsening, a 'soft' or 'hard' trigger will be released. A 'hard' trigger will inform the man's clinical team to contact him – and they'll be in touch within 48 hours. He'll also receive self-management content tailored to his area of distress to help himself manage his symptoms. At a 'soft' trigger he will receive an email linking him to the self-management content tailored to his area of distress.

This study will contribute to better understanding the experiences of men with advanced prostate cancer, providing an evidence base for best practices for advanced prostate cancer care, and how to integrate PROMs into real-time care. The study will be implemented at seven sites across the UK, Canada, Australia, the US, and is expected to run until May 2024.

Who is delivering it?

Movember is directly funding and overseeing the project. The Prostate Cancer Clinical Trials Consortium (PCCTC) in the US is the global data coordination centre for the project.

How much funding has been invested?

Full details of funding for this project can be found in the UK country section below.

GAP 3: ACTIVE SURVEILLANCE

Although prostate cancer detection has advanced greatly in recent years, many men with slow-growing tumours have undergone treatment even though it was unlikely that their cancer would progress. This is known as 'overdiagnosis' and 'overtreatment'. This group of men can suffer significant side effects from treatment, such as incontinence and sexual dysfunction, that affects their quality of life. In many cases, these men may not have needed any treatment at all, and really only needed their cancer to be properly monitored. Active surveillance is a strategy designed to help avoid this problem.

The GAP3 Prostate Cancer Active Surveillance project aims to help improve how men living with low-risk prostate cancer are managed and reduce the burden of them being over-treated. The project includes collection of clinical, MRI and genomics data, as well as Patient Reported Outcome Measures (PROMs), from over 20,652 men who have chosen active surveillance instead of an active treatment option that involves immediate therapy. Data has been collected from men attending 28 hospitals, medical research institutions and treatment centres across 16 countries. Analysing this data will enable researchers and clinicians to address critically important research questions that will lead to the optimal management of men with low-risk prostate cancer.

¹ Australia, Brazil, Canada, Ireland, Nigeria, Norway, Spain, Sweden, Switzerland, United Kingdom and US. The Bahamas, Jamaica, Barbados, South Africa and Kenya are pending activation.

Who is delivering it?

Movember is directly funding this project. The Erasmus Medical Centre in Rotterdam, Netherlands is the data coordination centre for the project.

How much funding has been invested?

Full details of funding for this project can be found in the Rest of World section below.

GLOBAL CANCER REAL WORLD EVIDENCE NETWORK

Over the past decade Movember has played a leading role globally in biomedical research funding to develop new tests and treatments, and improving the quality of life for men living with prostate cancer through clinical quality registries that improve the quality of cancer treatment and digital health programs that empower men with the knowledge and support to better manage treatment side effects.

Our global priority now is to accelerate implementation of all these programs to reach and improve the lives of men with prostate cancer around the world.

There is also a real need to understand how new prostate cancer tests and treatments perform in the real world, outside of clinical studies, where the men who typically take part are not representative of all populations.

To this end, Movember has launched the Global Cancer Real World Evidence Network, which will fast-track efforts to improve the treatment and care of men diagnosed and living with prostate cancer.

Believed to be the first of its kind, the network will contain detailed clinical information on the diagnosis, treatment and survivorship of men living with prostate cancer from over 15 countries and 500 clinical partners.

Movember is aiming to grow the network to include data on 250,000 men within the next five years. The data will enable prostate clinicians throughout the world to measure and benchmark the health of their patients after treatment and provide them with vital information to improve the quality of prostate cancer treatment and care.

The data will not only allow cancer specialists to monitor how patients are responding to new therapies, it will enable researchers to fast track the recruitment process for clinical trials by providing access to suitable patients.

In addition, the initiative will improve patient access to digital resources such as Movember's True North program which provides men and their families with treatment information and tailored lifestyle advice. This enables them to manage the physical and mental side effects of living with cancer, as well as the long-term side effects of treatment.

The project will start with the Prostate Cancer Outcomes Registry – Australia and New Zealand (PCOR-ANZ) database, with other Movember-supported patient registries from other countries to follow.

Who is delivering it?

Movember is directly funding and overseeing this project.

How much funding has been invested?

Full details of funding for this project can be found in the Australia, Canada, Ireland sections below.

PROSTATE CANCER OUTCOMES REGISTRY - AUSTRALIA AND NEW ZEALAND

The Prostate Cancer Outcomes Registry Australia and New Zealand (PCOR-ANZ) is a large-scale prostate cancer registry that collects information on the care provided and the outcomes for men diagnosed with prostate cancer in Australia and New Zealand.

For the first time, doctors, researchers and men affected by the disease are working together to improve the wellbeing of those diagnosed and living with prostate cancer. So far, over 78,000 men have contributed to PCOR-ANZ and that number is continually growing.

Clinicians and hospitals contributing data to the New Zealand Registry receive six-monthly Quality Indicator reports. These reports provide benchmarked information on how sites perform against a series of quality-of-care indicators compared to other participating sites across Australia and New Zealand. Quality Indicator reports also provide benchmarked comparisons of patient outcomes for participating sites. In 2021, a new Quality Indicator report specific for radiation oncologists was distributed for the first time, in addition to the bi-annual distribution of reports to urologists.

Over time, these reports will help to improve clinical practice and patient outcomes for men in Australia and New Zealand with an overall goal of reducing the number of men suffering lifelong adverse side effects from prostate cancer treatment.

The registry produces a publicly available annual report of patient reported outcomes linked to treatment. The 2021 Annual Report will be released in 2022 and will be available for download from the project website - www.prostatecancerregistry.org

Who is delivering it?

Movember is overseeing the program, with delivery provided through Monash University.

How much funding has been invested?

Full details of funding for this project can be found in the New Zealand country section below.

MENTAL HEALTH & SUICIDE PREVENTION

SOCIAL INNOVATORS CHALLENGE PROGRAM

The Social Innovators Challenge (SIC) is a program focused on strengthening and building the social connections of men in Australia, Canada, and the UK. Strong relationships are a key protective factor against anxiety, depression and suicide. The goal of the SIC project, which first launched in 2016, was to increase our understanding of what engages men to build quality connections, particularly those at risk of becoming socially isolated. Following an extensive review process, 13 projects, were approved for funding. Three years on, three projects – Dad Hero, The Changing Room and Waves of Wellness – were approved for scaling over the next three years. In addition, a further three projects received additional funding for up to 18 months.

Who is delivering it?

Movember manages the SIC program centrally from Canada with support for funded projects in participating markets.

How much funding has been invested?

Full details of funding are noted in the Australia, Canada and UK country sections below.

VETERANS AND FIRST RESPONDERS MENTAL HEALTH GRANT PROGRAM

In recent years, there has been growing awareness that first responders and military veterans are at greater risk than the general population for both poor mental health and suicide. A report, commissioned by Movember in 2019, found that lives could be improved or even saved if programs designed to support these groups were properly validated and backed by strong evidence.

As a result of the findings, Movember, in partnership with The Distinguished Gentleman's Ride (DGR), announced funding for programs that improve support for veterans, first responders and veteran and first responder families across six countries (United Kingdom, Australia, United States, Canada, New Zealand and Ireland). A global knowle hub will be developed to share information on best practices in implementation, evaluation, programs, and approaches aimed at improving the mental health for veterans and first responders.

Who is delivering it?

Movember manages the VFR program centrally from Canada with support for funded projects in participating markets. Movember's Monitoring Research and Evaluation team is working with the Mental Health & Suicide Prevention (MHSP) team to oversee the evaluation of the program.

How much funding has been invested?

Full details of funding are noted in the Australia, Canada, New Zealand, UK and Rest of World country sections below.

DGR SOCIAL CONNECTIONS CHALLENGE

Research shows that men who are satisfied with their relationships and social connections are more likely to enjoy good mental health and wellbeing.

However, riding can be inherently isolating, which is why Movember, in partnership with DGR, is aiming to find ways for motorcyclists to create stronger connections with each other to improve their overall mental health and wellbeing.

Phase 1 – Idea Development, resulted in 16 project teams from across Australia, Canada, New Zealand, the UK and the US, submitting pilot project plans.

Following a review process, Pilot grants were awarded to project teams to trial their ideas for a 12-month period. Eight project teams passed the due diligence process with one team in the US withdrawing due to inability to secure a fiscal sponsor. Pilot projects are being carried out in four markets (Australia, Canada, New Zealand & the UK).

Who is delivering it?

Movember manages the DGR-SCC program centrally from Canada. Movember's Monitoring Research and Evaluation team is working with the MHSP team to oversee the evaluation of the program.

How much funding has been invested?

Full details of funding are noted in the Australia, Canada and UK country sections below.

DIGITAL SOCIAL CONNECTIONS CHALLENGE

The COVID-19 global pandemic profoundly impacted the way people connect with each another. In response, Movember and DGR launched the Social Connections Challenge, a global search for digital or technology-focused ideas that would help maintain or strengthen male social connections and tackle isolation.

This multi-phased funding opportunity which opened in August 2020 was particularly aimed at men who are at greater risk of social isolation because of where they live, their socio-economic status or cultural background.

Following a review process, a shortlist of 72 ideas were selected from Australia, Canada, Ireland, New Zealand and the UK. Eleven project teams were selected through an external review process and will be co-developing their ideas with Movember over a 12–24-month period. Projects are being carried out in Australia, Canada, Ireland and the UK. In phase 3 successful projects will be implemented.

Who is delivering it?

Movember manages the Digital SCC program centrally from Canada with support from teams in participating markets.

How much funding has been invested?

Full details of funding are noted in the Canada and UK sections below.

MEN BUILDING BETTER RELATIONSHIPS

Men who have recently experienced relationship breakdown are a higher risk of suicide than the general population, and women. There is a lack of evidence-based upstream programs to help men build better relationships with their partners. Movember would like to reduce the rate of negative health outcomes for men resulting from distressed relationships, separation and divorce, and increase wellbeing through strengthening healthy relationships.

- Build men's relationship skills
- Develop strategies for amicably working through relationship breakdowns
- Model what positive relationships look like
- Challenge rigid adherence to certain masculine norms such as stoicism and self-reliance
- Reduce suicide and other harms with interventions that serve to prevent, rather than treat

This project commenced in August 2021 and is expected to pilot in Australia in June 2022 until December 2022. Following on from this, a decision will be made on whether to globally scale the program.

Who is delivering it?

Movember is directly funding and overseeing this project.

How much funding has been invested?

Full details of funding are noted in the Australia, Canada, Ireland, UK, US, New Zealand sections below.

NEW DADS MENTAL HEALTH PROGRAM

Movember seeks to improve the confidence, mental health and wellbeing of fathers (and their partners, primary caregivers and children) globally. Our vision is that men are confident and engaged fathers; and that they take action early for their mental wellbeing.

To achieve this, Movember will provide applied digital resources and solutions to enable fathers to navigate through the challenges of fatherhood, build resilience and improve their mental health.

Fathers are an underserved and at-risk population for poor mental health. The transition to fatherhood and becoming a new father can raise challenges. Between 10% - 20% of fathers experience anxiety and depression during the perinatal period.

Paternal Post Natal Depression (PPND) usually affects dads in the first year of their child's life and they appear to be most vulnerable when their baby is between three and six months old.

Movember will support fathers and primary caregivers through a comprehensive online resource aimed at perinatal fathers to support men in the transition to fatherhood.

Who is delivering it?

Movember is directly funding and overseeing this project.

How much funding has been invested?

Full details of funding are noted in the Australia, Canada, UK, US, New Zealand sections below.

Movember allocated a total of **\$716,812.81** of the 2021 Campaign proceeds to **three** projects:

PROGRAM FOCUS	PROGRAM TYPE	PROJECT NAME	FUNDING AMOUNT (AUD)
Prostate Cancer	Biomedical Research/ Clinical Quality / Survivorship	Global Cancer Real World Evidence Network	\$358,406.51
Mental Health	Mental Health & Suicide Prevention	Veterans & First Responders Mental Health Grant Program	\$ 215,044
Mental Health	Mental Health & Suicide Prevention	DGR Social Connections Challenge	\$143,362.60

PROSTATE CANCER BIOMEDICAL RESEARCH

Movember invests in biomedical research projects that aim to achieve breakthroughs in prostate cancer from prevention to treatment and survivorship.

DGR NEW CONCEPT GRANTS

The DGR New Concept Grants aimed to encourage and support cutting-e innovative ideas of senior scientists working in the field of prostate cancer research. Movember allocated AUD \$398,738 of the 2016 DGR Campaign proceeds to fund four DGR New Concepts Grants in 2017:

GRANTEE	RESEARCH PROJECT
PROFESSOR MELISSA SOUTHEY University of Melbourne	Heritable epigenetic risk factors for prostate cancer Many men who have other members of their families also diagnosed with prostate cancer do not have genetic changes in their DNA that explain the familial cancer susceptibility. This study looked at changes in the environment surrounding DNA (called epigenetic changes) that modify DNA without changing its sequence. This study systematically scanned the genome for places where epigenetic changes were heritable (passed from parent to child) and found 41 of these heritable epigenetic changes were associated with increased prostate cancer risk. This information will be used with existing risk prediction models and molecular testing strategies for prostate cancer to improve prostate cancer risk prediction for all men.
ASSOCIATE PROFESSOR: JOSE POLO Monash University	A predictive computational framework for targeted reprogramming of castrate resistant prostate cancer Identifying the key factors that control growth of cancer cells is notoriously difficult to predict. Using a novel mathematical approach called Mogrify, the study initially identified nine candidate factors (out of ~ 2000). Further investigation showed that targeting five of these factors were able to slow the tumour cell growth significantly, with one particular factor causing an amazing 70% death of the cancer cells. In summary, the ability to successfully predict novel targets to aggressive prostate cancer cells has revealed novel therapies that would otherwise have gone unnoticed.
PROFESSORS DEREK HART AND LISA HORVATH ANZAC Research Institute & Chris O'Brien Lifehouse	Therapeutic vaccination for prostate cancer using mRNA-loaded blood dendritic cells This project proposed to train the immune system to fight cancer by vaccinating men with prostate cancer using specialised white blood cells, called dendritic cells. The research team has developed the means to isolate these cells and use them to educate the immune system to fight a man's own cancer. The research team will continue to optimize the vaccine in pre-clinical studies in preparation to test the vaccine in a clinical trial.
Professor Roger Daly Monash University	A new approach for characterizing stromal interactions in prostate cancer and identifying therapeutic targets In this project, the research team has developed a method to detect chemical signals between cancer-associated fibroblasts and prostate cancer cells. In addition, the team identified an important secreted enzyme, termed LOXL2, that promotes the spread of cancer cells.

These projects commenced in early 2017 with the final reports received in 2018. To date there have been seven publications and secured over AUD \$2.4 million funding based on research findings from these projects.

DGR YOUNG INVESTIGATOR GRANT

The Young Investigator Grant was aimed at encouraging post-doctoral researchers to undertake work in the field of prostate cancer and support those investigators as they mature towards becoming independent scientists.

Dr. Ian Johnson (University of South Australia) was awarded AUD \$100,000 for his project titled “Altered endosome trafficking in prostate cancer” to study how cancer changes the way nutrients are moved and recycled via formation of small compartments within the cells. The study found that the cellular machinery responsible for the trafficking of these small packages are elevated in prostate cancer cells. This results in faster movement of the packages to affect the way cancer cells can grow and metastasise out of the prostate to other tissues. The research team will continue to investigate two of the identified cellular machineries to attempt to put the brakes on cancer progression by slowing the package movement. Dr. Johnson’s one-year funding began in early 2017 and results from the research were published in the International Journal of Molecular Sciences in 2019. He is now a research fellow within the Mechanisms in Cell Biology and Diseases Research Group and investigates health disease pathogenesis using space-like environments such as simulated microgravity in the field of Space Biology at the UniSA Clinical & Health Sciences, University of South Australia.

CLINICAL TRIAL AWARD

The Movember - DGR Clinical Trial Award supports clinical trials initiated in Australia that have the capacity to transform the treatment of men with prostate cancer within the course of the trial and/or immediately post completion of the trial.

Movember allocated AUD \$230,588 from the 2016 Campaign to the TheraP trial, led by Professor Michael Hofman, at the Peter MacCallum Cancer Centre. The trial had an overall budget of AUD \$1,500,000 and was co-funded by Movember (AUD \$19,412) and ANZUP/PCFA (AUD \$1,250,000).

The randomised Phase 2 study compared the safety and efficacy of a new type of treatment called ¹⁷⁷Lu-PSMA radionuclide therapy against the standard chemotherapy for men with advanced prostate cancer.

This unique therapy involves ‘mapping’ the prostate cancer cells with a PET scan and then treating them with a radioactive substance (¹⁷⁷Lu), which unlike conventional chemotherapy, destroys cancer cells, while minimising damage to healthy surrounding tissue.

Presented as a game changing session at the 2021 European Association of Urology annual meeting, Professor Hofman showed that, men who had ¹⁷⁷Lu-PSMA had better response rates, better quality of life and were less likely to see their cancer progress after a year, than men who received standard chemotherapy (cabazitaxel).

This trial has demonstrated that ¹⁷⁷Lu-PSMA represents a promising new class of effective therapy for men with metastatic, castration-resistant prostate cancer. It is currently being reviewed by regulatory authorities in the US and Australia, with a decision expected by mid-2022.

Movember allocated AUD \$92,372 to the ProPSMA trial from the 2017 campaign, which was led by Professor Michael Hofman and Professor Declan Murphy at the Peter MacCallum Cancer Centre. The trial was co-funded by Movember (AUD \$1,435,286).

The Phase 3 ProPSMA trial involved a total of 300 men recruited from across Australia, all of whom had been diagnosed with prostate cancer and were at high risk of having aggressive disease. Participants were randomly assigned to receive either conventional CT and bone scans or ⁶⁸Ga-PSMA PET/CT to determine the extent to which the tumour has spread.

Published in the journal Lancet in April 2020, ⁶⁸Ga-PSMA PET/CT scans were much more accurate than the conventional scans at detecting cancer spread. In addition, more men had their treatment plans changed after a ⁶⁸Ga-PSMA PET/CT scan was done than a conventional CT and bone scan.

Results from the trial have contributed to the overwhelming evidence that supported the regulatory approval of ⁶⁸Ga-PSMA PET/CT, with the potential to change clinical practice and become the standard of care in staging prostate cancer.

CLINICIAN SCIENTIST AWARD

Movember allocated \$351,669, from the 2017 Campaign to the Clinician Scientist Award

This award aimed to support outstanding, clinically qualified professionals to establish themselves as independent clinician researchers in the field of prostate cancer.

Dr Niall Corcoran’s was awarded funding for his project “Investigation of mechanisms of prostate cancer metastasis and treatment resistance”, which aimed to develop methods of distinguishing potentially lethal and indolent tumours early in their natural history, improving outcomes for men with localised prostate cancers using deep genomic sequencing.

Dr Corcoran and his team has identified genomic variants associated with adverse clinical outcomes in localised prostate cancer and validated the utility of ctDNA as a prognostic biomarker. In addition, they have identified a potential predictive biomarker that could help to determine if men with localised.

PROSTATE CANCER RESEARCH ALLIANCE

Movember allocated a total of AUD \$699,510 from Campaign proceeds (AUD \$463,975 from the 2018 campaign and AUD \$235,535 from the 2019 campaign) to support the Prostate Cancer Research Alliance (PCRA).

The initiative, which is jointly funded by the Australian Government and Movember, has a total but of AUD \$12 million dollars in funding three multi-disciplinary teams that will accelerate the “bench-to-bedside” translation of prostate cancer research and change clinical practice in the near term. The program was formally launched by the Hon Greg Hunt MP in October 2018 and three successful research teams were confirmed in March 2019.

GRANTEE	RESEARCH PROJECT
ASSOCIATE PROFESSOR ARUN AZAD & PROFESSOR MICHAEL HOFMAN Peter McCallum Cancer Centre / The University of Melbourne	<p>Up-Front PSMA Alliance: Using theranostics early to eradicate prostate cancer and developing novel strategies for PSMA-negative disease</p> <p>The research team began two clinical trials to determine the safety and efficacy of ¹⁷⁷Lu-PSMA, a novel radionuclide therapy, in men with high-risk localised disease (the LuTectomy trial) and in men with metastatic, hormone-sensitive prostate cancer (the UpFrontPSMA trial). Until then, this therapy had only been studied as a “last line” therapy after standard options have been exhausted but these two projects will enable the game-changing treatment to be used as a first line therapy and hopefully extend the lives of men with prostate cancer.</p> <p>Despite initial delays due to restrictions related to the COVID pandemic, both trials successfully began recruitment in 2020 and are on-track to complete recruitment by mid 2022.</p>
ASSOCIATE PROFESSOR LOUISE EMMETT St Vincent’s Hospital Sydney / ANZUP	<p>ENZA-p: An imaging, biomarker and therapy trial</p> <p>Precision medicine is the concept of treating someone’s cancer with the right treatment at the right time. ENZA-p aims to use new radionuclide therapy (¹⁷⁷Lu-PSMA) to achieve this goal. While early trials have shown that ¹⁷⁷Lu-PSMA is well tolerated and is effective in treating advanced prostate cancer, the research team will examine if the combination of ¹⁷⁷Lu-PSMA with potent hormone blockers, such as enzalutamide, may be more effective than either treatment alone. This project aims answer some of the key questions in order to optimize the Lu-PSMA plus enzalutamide treatment, and in the process improve the standard of personalised medicine that can be offered to men with metastatic prostate cancer.</p> <p>Despite initial delay due to restrictions related to the COVID pandemic, the trial was successfully activated in August 2020 and are on-track to complete recruitment by mid 2022.</p>

ASSOCIATE PROFESSOR
NIALL CORCORAN

The University of Melbourne

PRostatE CancEr Prognosis and Treatment

Cancer is a disease of DNA, where changes to DNA lead to the uncontrolled growth and spread associated with the disease (metastasis). The research team want to develop a tissue and blood test that will better inform the risk of disease progression. This will help with identifying men at risk of progression early and improve the selection for potentially morbid treatments.

The team has successfully integrated data from a number of international databases and has almost completed data analysis for a tissue-based prognostic test that can identify how prostate cancer metastasizes. They are also looking to establish collaboration with large clinical trial consortium and tissue biobanks to gain access to samples for development of companion diagnostic test that can predict a man's treatment response in high-risk disease.

Overall, the research progress is currently on track but there may be delays due to the COVID-19 pandemic.

The PCRA program is managed by Movember with co-governance by Cancer Australia. Originally set to be completed by late 2022, the program has been granted no-cost extension until end of 2023.

GLOBAL CANCER REAL WORLD EVIDENCE NETWORK

How much funding has been invested?

Thanks to the Distinguished Gentlemen's Fund, Movember has been able to invest **AUD \$104,590** from the 2020 Campaign and **AUD \$358,406.51** from the 2021 Campaign proceeds into this project. Full details about this project are noted in the International Projects section above.

PROSTATE CANCER SURVIVORSHIP

TRUE NORTH DIGITAL HEALTH

How much funding has been invested?

Thanks to the Distinguished Gentlemen's Fund, Movember has invested **AUD \$97,243** from 2016 Campaign proceeds to support the development global pilot project. In addition, Movember has been able to invest **AUD \$231,738** from the 2018 Campaign and **AUD \$235,535** from the 2019 Campaign into this project, details of which are noted in the International Projects section above.

TRUE NORTH SEXUAL HEALTH PROJECT

How much funding has been invested?

Thanks to the Distinguished Gentlemen's Fund, Movember has been able to invest **AUD \$321,918** from 2017 Campaign proceeds into this project. Full details about this project are noted in the International Projects section above.

PROSTATE CANCER CLINICAL QUALITY

TRUE NORTH GLOBAL REGISTRY

How much funding has been invested?

Thanks to the Distinguished Gentlemen's Fund, Movember has been able to invest a total of **AUD \$118,812** from the 2018 Campaign to support this project. Full details of this project are noted in the International Projects section above.

IRONMAN - AN INTERNATIONAL REGISTRY FOR MEN WITH ADVANCED PROSTATE CANCER

How much funding has been invested?

Thanks to the Distinguished Gentlemen's Fund, Movember has been able to invest a total of **AUD \$104,590** from the 2020 Campaign to support this project. Full details of this project are noted in the International Projects section above.

MENTAL HEALTH AND SUICIDE PREVENTION

SOCIAL INNOVATORS CHALLENGE PROGRAM

Funding from the 2016 Campaign continued to support completion of Phase 2 implementation activities of the following five projects:

- Dad's Group Inc. - 'DGI Connect'
- Orygen - 'Entourage'

- Queensland University of Technology - ‘Well Played!’
- Soldier On - ‘Vet Connect’
- Waves of Wellness Foundation - ‘WOW Sand n’ Surf’

Following assessment of Phase 2 Business Plan submissions from pilot project teams, the Movember Board approved further funding for Phase 3 Scaling of the SIC and is currently supporting **Waves of Wellness – WOW Sand n Surf** across Australia until October 2023.

Who is delivering it?

Movember manages the SIC program centrally from Canada with support for funded projects in Australia.

How much funding has been invested?

Through the Distinguished Gentlemen’s Fund, Movember invested **AUD \$145,865** into Phase 2 of the program.

VETERANS AND FIRST RESPONDERS MENTAL HEALTH GRANT PROGRAM

The following three projects are implementing projects in Australia:

ORGANISATION	PROJECT SUMMARY
<p>FLINDERS UNIVERSITY IN PARTNERSHIP WITH BREAKTHROUGH MENTAL HEALTH RESEARCH FOUNDATION</p> <p>Protecting Emergency Responders with Evidence-Based Interventions (PEREI)</p>	<p>A significant proportion of Australian emergency service personnel suffer high psychological distress (anxiety and depression, 21%), posttraumatic stress disorder (10%), and suicidal thoughts (5%) – rates that are double the national average. The novel PEREI project (Protecting Emergency Responders with Evidence-Based Interventions) delivers an 8 week wellbeing and resilience program to police and fire service members in the first two years of service. The project includes a parallel wellbeing program tailored for members’ significant others, with a final yet critical part of the project providing senior supervisors with training, skills, and support so they can promote good mental health, and identify and work with members who may have mental health challenges.</p>
<p>EVERYMIND</p> <p>Minds Together: An Online Program for Family and Friends of Paramedics Impacted by Mental Ill-Health</p>	<p>Minds Together is an early-intervention initiative that will be adapted for family and friends of paramedic first responders. Paramedics experience disproportionate burdens of trauma, PTSD, psychological distress, and suicidal behaviour. More than half of those experiencing mental ill-health will not seek treatment or formal support. Families and friends provide most of the practical and emotional support for their loved ones and are therefore key to improving outcomes for paramedics. Support and caring roles can be rewarding, but care-giving can often come at significant physical, emotional and social costs. Everymind has developed the Minds Together online program to address the needs of families and friends, with an adapted program to meet the specific needs of paramedic first responders and their caregivers. The program will assist family and friends to support paramedics experiencing mental ill-health, and ensure better mental health and wellbeing for themselves. Everymind will partner with NSW Ambulance, FORTEM Australia and the University of Newcastle to implement this project across Australia.</p>
<p>DISASTER RELIEF AUSTRALIA</p> <p>Validation of Disaster Relief Australia’s Program to Support Veterans and First Responders to Grow Beyond Their Service</p>	<p>The benefits of volunteering and civic service are documented to have positive effects on mental health. Disaster Relief Australia proposes to conduct a longitudinal study to research and validate the physical, social, psychological and psychosocial benefits male veterans and first responders receive from participation in Disaster Relief Australia’s volunteering program to assist them to grow beyond their service.</p>

Who is delivering it?

Movember manages the VFR program centrally from Canada with support for funded projects in participating markets. Movember's Monitoring Research and Evaluation team is working with the MHSP team to oversee the evaluation of the program.

How much funding has been invested?

Thanks to the Distinguished Gentlemen's Fund, Movember has been able to contribute **AUD \$463,974** from the 2018 Campaign, **AUD \$157,024** from the 2019 Campaign and **AUD \$215,044** from the 2021 campaign towards the research and development of tailored programming for military veterans and first responders. Full details are noted in the International Projects section above.

DGR SOCIAL CONNECTIONS CHALLENGE

The following **six** projects from Australia are currently piloting their ideas in Phase 2 of the DGR Social Connections Challenge:

- **Mind Moto** – Putting the Cog in Cognition. Aimed at male motorcyclists of all ages, this initiative aims to build participants' skills and understanding of good motorcycling practices as well as give them new tools for their mental health toolbox and provide them with the confidence needed to deal with life's challenges.
- **The Workshop Project** targets men between 25-50 in urban areas. The project team is proposing to use an app to bring together motorcyclists in a safe and sustainable way to enable them to build friendships and local support around their shared passion for motorcycles.
- **Konnections**, based at Melbourne's Kustom Kommune DIY Motorcycle workshop, expands on the existing "We Kare" support program that targets middle-aged male motorcyclists. Konnections has proposed to bring in a dedicated team of health care professionals, mentors and volunteers for men in need of extra support.
- **Lost Motos** aims to change the conversations that take place around motorcycles to empower men to develop meaningful and emotionally engaged relationships with others. The project will engage mental health professionals to upskill project leaders, provide Mental Health First Aid courses and hold SpeakEasy nights.
- **Solace Garage** is a mentor & support program that brings a wide variety of at-risk males of all ages together in a supportive community that shares a common interest in motorcycles. The project team aims to broaden the scope to include rider training, safe maintenance and modifications, and the potential to work with motorcycles as a job.

- **The Riders Project** is an online video series, produced in partnership with the motorcycle community worldwide, which combines photography, audio interviews and music to create an authentic and compelling mental health story.

Following external panel review of pilot project plans to test ideas produced from Phase 1, **Mind Moto**, **The Workshop Project**, and **Konnections** are currently piloting their ideas in Phase 2 of the DGR Social Connections Challenge:

Who is delivering it?

Movember is managing the implementation and evaluation elements of the project.

How much funding has been invested?

Thanks to the Distinguished Gentlemen's Fund, Movember has been able to contribute **AUD \$157,024** from the 2019 Campaign and **AUD \$143,362.60** from the 2021 Campaign to fund the development and piloting of initiatives in Australia.

MOVEMBER SPEAKEASY PROGRAM

Movember SpeakEasy workshops are a celebration of meaningful connection. No matter who you are, everyone goes through tough times. The workshops address this by normalising everyday challenges and encouraging us all to be more open to deal with these things that come up in our lives, especially the tough stuff.

The SpeakEasy program gives attendees, both men and women, the capability to reach out to men and support them to take action, in the context of a strong social network.

Delivered in partnership with The Man Cave, the workshops are packed with everyday tools to help attendees build stronger connections with their social groups and to be there to support them when times get tough.

These online and face-to-face workshops help attendees to actively build skills to support those that they care about. They also learn how to look after themselves and get the help they need, when they need it.

Funds from the DGR 2017 campaign allowed Movember to deliver a series of live events in Australia throughout 2018/19. A small series of events were also held in Ireland (over Zoom due to Covid-19 restrictions) to test for cultural variation in uptake and responses. The workshops in Australia were evaluated and the results concluded that despite being a minor intervention (two-hour session), this type of event was successful in influencing behaviour change.

The next stage of this program is to deliver these workshops where men tend to gather, in their workplaces, universities and sports clubs etc and test the appeal and effectiveness in several overseas locations. The longer-term vision for the program is to scale these events across Australia, New Zealand, UK, Canada and the US to reach and impact tens of thousands of men around the world.

On completion of all components of the current phase of the program, a further evaluation report will be prepared, with recommendations made for the next phase and future funding requirements.

Who is delivering it?

Movember is directly managing the program, in partnership with the Man Cave for workshop delivery, and Distinguished Gentleman's Ride as funding partner.

How much funding has been invested?

Thanks to the Distinguished Gentlemen's Fund, Movember invested **AUD \$321,918** from the 2017 Campaign proceeds to support the program.

MEN BUILDING BETTER RELATIONSHIPS

How much funding has been invested?

Thanks to the Distinguished Gentlemen's Fund, Movember invested **AUD \$209,181** from the 2020 Campaign proceeds to support the program.

CANADA

CANADA

INVESTMENT SUMMARY

Movember allocated a total of **CAD \$137,708** of 2016 Campaign proceeds to **two** projects in Canada:

PROGRAM FOCUS	PROGRAM TYPE	PROJECTS NAME	FUNDING AMOUNT (CAD)
Prostate Cancer	Biomedical Research	Translation Acceleration Grants	\$110,166
Mental Health	Mental Health & Suicide Prevention	Social Innovators Challenge Program	\$27,542

Movember allocated a total of **CAD \$235,104** of 2017 Campaign proceeds to **three** projects in Canada:

PROGRAM FOCUS	PROGRAM TYPE	PROJECT NAME	FUNDING AMOUNT (CAD)
Prostate Cancer	Biomedical Research	Translation Acceleration Grants	\$94,042
Mental Health	Mental Health & Suicide Prevention	Digital Social Connections Challenge	\$70,531
Prostate Cancer	Survivorship	True North Sexual Health Project	\$70,531

Movember allocated a total of **CAD \$319,873** of 2018 Campaign proceeds to **three** projects in Canada:

PROGRAM FOCUS	PROGRAM TYPE	PROJECT NAME	FUNDING AMOUNT (CAD)
Prostate Cancer	Biomedical Research	Translation Acceleration Grants	\$95,962
Prostate Cancer	Survivorship	True North Digital Health	\$95,962
Mental Health	Mental Health & Suicide Prevention	Veterans & First Responders	\$127,949

CANADA

INVESTMENT SUMMARY, CONTINUED

Movember allocated a total of **CAD \$358,770** of 2019 Campaign proceeds to **four** projects in Canada:

PROGRAM FOCUS	PROGRAM TYPE	PROJECT NAME	FUNDING AMOUNT (CAD)
Prostate Cancer	Biomedical Research	Prostate Cancer Biomedical Research Project	\$107,631
Prostate Cancer	Survivorship	True North Digital Health	\$107,631
Mental Health	Mental Health and Suicide Prevention	Veterans & First Responders Mental Health Grant Program	\$71,754
Mental Health	Mental Health and Suicide Prevention	DGR Social Connections Challenge	\$71,754

Movember allocated a total of **CAD \$245,824** of 2020 Campaign proceeds to **three** projects in Canada:

PROSTATE CANCER BIOMEDICAL RESEARCH

TRANSLATION ACCELERATION GRANTS (TAG)

Movember established a partnership with Prostate Cancer Canada, now the Canadian Cancer Society to support a range of biomedical research projects that could provide breakthroughs in prostate cancer prevention, treatment, and survivorship.

Movember has allocated a total of CAD \$407,801 from Campaigns (2016 to 2019) toward the Translation Acceleration Grants (TAG), which are launched annually to support teams of investigators studying novel approaches related to a specific research question.

Movember allocated CAD \$110,166 from the 2016 Campaign to the Translation Acceleration Grant (TAG2): Novel Therapeutics for Aggressive Disease

This project explored new treatment options for metastatic, castrate-resistant prostate cancer with the

potential to enter clinical trials within five years from the beginning of the funding period.

The project, led by Dr Christopher Ong from the University of British Columbia, was completed in September 2017 and has selected and validated a lead novel therapeutic inhibitor of SEMA3C, which is responsible for switching on multiple signalling pathways that drives uncontrolled growth and survival of advanced prostate cancer. The team is in the process of producing the SEMA3C inhibitor at a GMP manufacturing facility, which will be used to produce sufficient amount of the drug for toxicology and first-in-human clinical studies.

Movember allocated CAD \$94,042 from the 2017 campaign to the Translation Acceleration Grant (TAG7): Validation of Predictive Markers

The TAG7 program aims to support teams of investigators to validate biomarkers that have the potential to predict treatment responses and/or patient outcome. Three projects were granted funding:

GRANTEE	RESEARCH PROJECT
KIM CHI BC Cancer Agency 2018-2023	<p>Clinical utility of ctDNA for prognostic and predictive biomarkers for advanced prostate cancer</p> <p>Treatment options for advanced prostate cancer have expanded over the last 10 years. First-line therapy can work well for the majority of men; however, progression is inevitable and subsequent treatments benefit only a minority and there is an urgent need for a test that can help to select treatment with the best chance of benefit and avoid futile therapies.</p> <p>As pioneers in analysing circulating tumour DNA (ctDNA) for biomarkers, Dr Chi and his team has established a phase 2 clinical trial to determine the clinical utility of using ctDNA to inform treatment decision for men with advanced prostate cancer progressing after abiraterone.</p> <p>The PROTRACT trial was activated in late 2020 and is expected to complete the primary endpoint by late 2023.</p>
HOUSHENG HE University Health Network 2018-2021	<p>Combination of sub-pathology and noncoding RNA: Integrating outcome prediction and treatment individualisation for intermediate-risk prostate cancer</p> <p>There is still a wide range of disease severity within prostate cancer that contributes to the frequent under- and/or over-treatment of the disease. To address this, the team has identified a link between special pathological pattern of cancer cells, known as intraductal carcinoma (IDC) and cribriform architecture, with metastatic disease.</p> <p>Dr He and his team have received regulatory approvals from Health Canada and the regional research ethics board for a phase 2 clinical trial supporting the use of IDC/CA presence in diagnostic biopsies to guide a priori treatment intensification with darolutamide.</p>

GRANTEE	RESEARCH PROJECT
TAREK BISMAR University of Calgary 2018-2022	<p>Characterisation of novel molecular signature for accurately predicting prostate cancer progression in active surveillance</p> <p>More men are opting for active surveillance as an alternative to treatment for their cancer; however, they may be discouraged by either anxiety, fear of the disease progressing or the discomfort of repeated biopsies and added risk of bleeding and infections. This has led to approximately 20-30% men leaving the active surveillance program.</p> <p>The overarching goal of this project is to characterize novel molecular signatures that can accurately predict prostate cancer progression in men who are in active surveillance programs.</p> <p>With some delay due to the COVID-19 pandemic and closure of research labs, the team is moving forward with evaluation of all platforms, including identification of key molecular differences between prostate cancer in Middle Eastern ethnicity as compared to North American populations in the initial study.</p>

These projects commenced in October 2018 and are expected to be completed towards end of 2023.

Movember allocated a total of CAD \$203,593 from Campaigns (CAD \$95,962 from the 2018 Campaign and CAD \$107,631 from the 2019 Campaign) to the Translation Acceleration Grant (TAG8): Improving Patient Outcomes and Treatment Planning with Advanced Imaging

Launched in May 2019, this project aims to elucidate the value of novel imaging modality (PSMA PET) in improving outcomes for men with prostate cancer. Led by Professor Cynthia Menard from the Centre hospitalier de l'Université de Montréal, the team will conduct a randomized clinical trial with a primary objective of demonstrating if a therapeutic intervention (surgery, radiotherapy) that has been informed by PSMA PET/CT (using ¹⁸F-DCFPyL radiotracer) will improve outcomes (cancer control and quality of life) for men with prostate cancer at risk of undetected metastatic disease. The project will also evaluate the cost-effectiveness of this approach in order to provide the level of evidence necessary to ensure policy and practice change in the healthcare system.

The multi-institutional PATRON trial is in the process of activating across participating sites, with a total of 63 men enrolled as of October 2021. The primary endpoint results are expected to be available in late 2028.

Who is delivering it?

Following Prostate Cancer Canada's amalgamation with the Canadian Cancer Society in February 2020, the Canadian Cancer Society, currently manages these programs and provides project reports annually and at project completion.

How much funding has been invested?

Movember has provided a total of **CAD \$407,801** from 2016 to 2019 Campaign proceeds to support three TAG Programs (TAG2, TAG7 and TAG8).

GLOBAL CANCER REAL WORLD EVIDENCE NETWORK

Thanks to the Distinguished Gentlemen's Fund, Movember has been able to invest **CAD \$61,456** from 2020 Campaign proceeds and **CAD \$168,358.30** from the 2021 Campaign proceeds into this project, details of which are noted in the International Projects section above.

PROSTATE CANCER SURVIVORSHIP

TRUE NORTH DIGITAL HEALTH

Thanks to the Distinguished Gentlemen's Fund, Movember has been able to invest **CAD \$95,962** from the 2018 and **CAD \$107,631** from 2019 Campaign proceeds into this project, details of which are noted in the International Projects section above.

TRUE NORTH SEXUAL HEALTH PROJECT

Thanks to the Distinguished Gentlemen's Fund, Movember has been able to invest **CAD \$70,531** from 2017 Campaign proceeds into this project, details of which are noted in the International Projects section above.

PROSTATE CANCER CLINICAL QUALITY

IRONMAN - AN INTERNATIONAL REGISTRY FOR MEN WITH ADVANCED PROSTATE CANCER

Thanks to Distinguished Gentlemen’s Fund, Movember has been able to invest **CAD \$61,456** from 2020 Campaign proceeds into this project, details of which are noted in the International Projects section above.

- Canadian Families & Corrections Network - ‘Dad HERO Project’
- McGill University - ‘Homebase’
- University of British Columbia - ‘Apocalypse Made Easy!’

Following assessment of Phase 2 Business Plan submissions from pilot project teams, the Movember Board approved further funding for Phase 3 Scaling of the SIC and is currently supporting the scaling of **Dad Hero** until December 2023.

Who is delivering it?

Movember manages the SIC program centrally from Canada with support for funded projects.

How much funding has been invested?

Through the 2016 Campaign, Movember was able to invest **CAD \$27,542** of Phase 2 of the program in Canada.

MENTAL HEALTH & SUICIDE PREVENTION

SOCIAL INNOVATORS CHALLENGE PROGRAM

Funding from the 2016 Campaign continued to support completion of Phase 2 implementation activities of the following three projects:

VETERANS AND FIRST RESPONDERS MENTAL HEALTH GRANT PROGRAM

The following three projects are implementing projects in Canada:

ORGANISATION	PROJECT SUMMARY
<p>THE UNIVERSITY OF WESTERN ONTARIO</p> <p>Promoting Psychological Resiliency among Veterans and First Responders in Career Transition: Implementing and Evaluating Meaning-Centered Men’s Groups in Key Sectors at Elevated Risk for Suicide</p>	<p>Suicide is a global cause of preventable mortality, claiming over 800,000 lives annually. Middle-aged and older men have the highest suicide rates in Canada and worldwide, and account for over 75% of the nearly 50,000 lives lost to suicide every year in North America. Suicide prevention should focus on promoting psychological resiliency in vulnerable demographics; yet, few upstream programs have been designed for middle-aged and older men struggling with life transitions, including Veterans and First Responders (VFR) facing release or retirement. This proposal was designed to respond to this need by testing and disseminating Meaning-Centered Men’s Groups (MCMG) for VFR in career transition. The ultimate goal is to facilitate a safe career transition, promote mental health and well-being, and reduce risk for suicide among Veterans and First Responders.</p>
<p>BLUEPRINT FOR THE WELL-BEING OF MEN AND COMMUNITIES SOCIETY (FORMERLY THE MEN’S INITIATIVE)</p> <p>The First Responder Resiliency Program (FRRP)</p>	<p>The First Responder Resiliency Program (FRRP) is a retreat-based program designed for upstream implementation to enhance the psychological resilience of British Columbia (BC) police and fire fighter first responders. The program offers an intensive 34 hours of skill development for those looking to strengthen their domestic, organizational and operational stress competence and capacity at any stage of their career. Outcome data, across several key measures, has shown promise and the program has active waitlists of fire fighter and police participants.</p>
<p>MCMASTER UNIVERSITY</p> <p>“On-Call”: Implementing a mobile health approach to post-traumatic stress injury (PTSI) prevention and peer support for Canadian public safety personnel</p>	<p>The overall project goal is to advance implementation and evaluation of a new mobile health application, OnCall, a peer-to-peer support tool co-designed by and for Canadian Public Safety Personnel (PSP; e.g., correctional workers, firefighters, paramedics, police). OnCall, and the parallel application OnCallSupport, facilitates 24/7 access to high quality, confidential information and peer-to-peer support. OnCall includes links to a wellness toolbox, self-screening tools, and ‘tips to cope’.</p>

ORGANISATION**PROJECT SUMMARY**

CANADIAN MENTAL HEALTH ASSOCIATION ONTARIO DIVISION

Resilient Minds

Resilient Minds is an evidence-based, peer-to-peer skill building program designed by and for firefighters. Its curriculum not only focuses on how to use protective strategies for firefighters' own mental health but also how to support their peers, positively interact with distressed citizens, and reduce their risk of stress-related injury. Through the support, over 180 new peer firefighter instructors will be taught these skills and will then be able to reach a further 3,600 firefighters across the province of Ontario. Additionally, this fund will support the program's adaption for other first responders, including police and paramedics, who share the same need for resilience training.

Who is delivering it?

Movember manages the VFR program centrally from Canada with support for funded projects in participating markets. Movember's Monitoring Research and Evaluation team is working with the MHSP team to oversee the evaluation of the program.

How much funding has been invested?

Thanks to the Distinguished Gentlemen's Fund, Movember has been able to contribute **CAD \$127,949** from the 2018 Campaign and **CAD \$71,754** from the 2019 Campaign to support the delivery and evaluation of the program for military veterans and first responders, details of which are noted in the International Projects section above.

DGR SOCIAL CONNECTIONS CHALLENGE

The following **three** projects from Canada were selected to develop their ideas in the first phase of the DGR Social Connections Challenge:

- Project 'Team Building' is aimed at building a community around newer riders who are passionate about motorcycles and have an interest in learning more about mechanics and customization. The project aims to bring people together to participate in virtual bike builds who would not have otherwise had an opportunity to make connections.

- Men Riding for Sustainability and Wellness is an Alberta-based project that proposes to build an initiative that engages and encourages young male motorcycle riders to explore the environment, connect with each other, improve their mental well-being and increase their mental health literacy.
- Riding to Recovery is a peer-support program for riders with mental health concerns. Through virtual courses such as "Motorcycle Maintenance 101," or "Motorcycle Photography," participants learn the principles of recovery - connectedness, hope, autonomy, peer education and empowerment.

Following external panel review of pilot project plans to test ideas produced from Phase 1, **Project 'Team Building'** is currently piloting their idea in Phase 2 of the DGR Social Connections Challenge:

Who is delivering it?

Movember is managing the implementation and evaluation elements of the project out of Canada.

How much funding has been invested?

Thanks to the Distinguished Gentlemen's Fund, Movember has been able to contribute **CAD \$71,754** from the 2019 Campaign and **CAD \$84,179.14** from the 2021 Campaign to fund the project development and piloting of initiatives in Canada.

DIGITAL SOCIAL CONNECTIONS CHALLENGE

ORGANISATION**PROJECT SUMMARY**

UNIVERSITY OF BRITISH COLUMBIA

Storytelling for Justice

This project is a virtual interactive platform to showcase the talent of participating artists and storytellers, reduce stigmatization of people in prison, and build social connections between men in prison, men on parole, and in the wider community. The project would support digital storytelling, including the development of a digital art gallery - allowing the men to comment and engage with each other's art, while also allowing the public to witness the talent, artistry and hear the stories and wisdom from the men inside. It would include digital writing, theatre and art workshops, and filmed sessions hearing from those with lived experience of incarceration.

ORGANISATION**PROJECT SUMMARY**

KNOT LAB

Hello Jack

This project is the creation of a digital space where experienced, skilled, and wise senior men can impart knowle on younger men looking for new information. It will be a mobile or web-based app that will serve as a meeting point between vetted parties in search of a new experience - a place where retired professionals can mentor entry level employees in their field or hobbyists can teach seminars on the basics of woodworking. Beyond creating a temporary sense of purpose for isolated seniors, it will also facilitate feelings of inclusion, connection and development for both groups and enable valuable life lessons and skills to be learned.

Who is delivering it?

Movember manages the Digital SCC program centrally from Canada with support from teams in participating markets.

How much funding has been invested?

Thanks to the Distinguished Gentlemen's Fund, Movember has been able to contribute **CAD \$70,531** from the 2018 Campaign, details of which are noted in the International Projects above.

MEN BUILDING BETTER RELATIONSHIPS**How much funding has been invested?**

Thanks to the Distinguished Gentlemen's Fund, Movember invested **CAD \$122,912** from 2020 Campaign proceeds to support the program.

NEW DADS MENTAL HEALTH PROGRAM**How much funding has been invested?**

Thanks to the Distinguished Gentlemen's Fund, Movember invested **CAD \$84,179.14** from 2021 Campaign proceeds to support the programs.

PROSTATE CANCER CLINICAL QUALITY

PROSTATE CANCER OUTCOMES REGISTRY - AUSTRALIA AND NEW ZEALAND

Thanks to the Distinguished Gentlemen’s Fund, Movember has invested **NZD \$71,150** from the 2016 campaign, **NZD \$57,304** from the 2017 Campaign, **NZD \$71,436** from the 2018 Campaign, **NZD \$83,017** from the 2019 Campaign, and **NZD \$29,783** from the 2020 Campaign into this project. Further information about this project is detailed in the International projects section above.

GLOBAL CANCER REAL WORLD EVIDENCE NETWORK

Thanks to Distinguished Gentlemen’s Fund, Movember has been able to invest **NZD \$38,911.52** from 2021 Campaign proceeds into this project, details of which are noted in the International Projects section above.

VETERANS AND FIRST RESPONDERS MENTAL HEALTH GRANT PROGRAM

The following project is being supported in New Zealand:

ORGANISATION	PROJECT SUMMARY
FIRE AND EMERGENCY NEW ZEALAND Whanaungatanga Program	Whanaungatanga is a Maori word that translates, in part, as the close connection between people. The Whanaungatanga Program seeks to improve first responder wellbeing via organisational changes that promote connection, trust, and a strong sense of value and belonging. Central to this process is the belief that all individuals within Fire and Emergency have innate and inherent value. Therefore, interactions, systems, and policies within the organisation should reflect this in tangible ways. The program has been designed with a focus on male career firefighters who have high levels of exposure to critical incidents. The program provides a process whereby organizational factors contributing to psychological distress and injury are identified and eliminated or minimised.

Who is delivering it?

Movember manages the VFR program centrally from Canada with support for funded projects in participating markets. Movember’s Monitoring Research and Evaluation team is working with the MHSP team to oversee the evaluation of the program.

MEN’S HEALTH, MENTAL HEALTH AND SUICIDE PREVENTION

GO TO WHERE BOYS AND MEN ARE PROGRAM - YOUNG MEN

This program focuses on prevention, early intervention and health promotion as well as scaling the most promising approaches that Movember has funded in New Zealand and elsewhere since 2007.

One of Movember’s most promising projects, Ahead of the Game mental fitness workshops are aimed at young men, their parents and sports coaches and delivered through community sports clubs.

Funding from the DGR 2016 was used to help develop Rugby New Zealand’s mental health program ‘Headfirst’. Through this partnership, 283 participants received ‘Headfirst’ training in person during the second half of 2020. Rugby New Zealand secured funding for a third year of the program (2021-2022).

Who is delivering it?

Rugby New Zealand will be delivering this project in partnership with Movember and the Mental Health Foundation of New Zealand.

How much funding has been invested?

Thanks to the Distinguished Gentlemen’s Fund, Movember invested **NZD \$30,493** from the 2016 Campaign into this project.

How much funding has been invested?

Thanks to the Distinguished Gentlemen’s Fund, Movember has been able to invest **NZD \$47,624** from 2018 Campaign proceeds and **NZD \$27,672** from 2019 Campaign proceeds into this project, details of which are noted in the International Projects section above.

DGR SOCIAL CONNECTIONS CHALLENGE

The following **two** projects from New Zealand were selected to develop their ideas in the first phase of the DGR Social Connections Challenge:

- **The Motorcycle Collective** is a social enterprise that aims to create a supportive community for motorcycle enthusiasts of all ages. The project aims to use their workshop to create a welcoming space for building connection amongst people from all walks of life. Through a shared passion for riding, participants will be provided with the skills and awareness needed for better mental health and wellbeing.
- **The Tinker, Talk & Tour** project will take an existing concept and adapt it for a digital audience. Its aim is open up conversations about mental health using the language and cultural references of the motorcycling community.

Following external panel review of pilot project plans to test ideas produced from Phase 1, **The Motorcycle Collective** is currently piloting their idea in Phase 2 of the DGR Social Connections Challenge:

Who is delivering it?

Movember is centrally managing the implementation and evaluation elements of the program out of Canada.

How much funding has been invested?

Thanks to Distinguished Gentlemen's Fund, Movember has been able to invest **NZD \$27,672** from 2019 Campaign proceeds and **NZD \$38,476** from 2021 Campaign proceeds to this project, details of which are noted in the International Projects section above.

MEN BUILDING BETTER RELATIONSHIPS

How much funding has been invested?

Thanks to the Distinguished Gentlemen's Fund, Movember has been able to invest **NZD \$29,783** from 2020 Campaign proceeds into this project, details of which are noted in the International Projects section above.

MEN'S HEALTH PROMOTION

THE MAN UP DOCUMENTARY FORMAT, NEW ZEALAND

This project involved the replication of the successful Australian 'Man Up' documentary series in New Zealand. The series, which was made up of two one-hour episodes, was produced by Gibson Group and aired nationally via major network TVNZ 1 on successive Tuesday nights in October 2020, then again in November 2021, with the documentary named 'Like a Man'.

The aim of this project was to improve the mental health and wellbeing of New Zealand men, at a population level, shifting attitudes and behaviour. We want to change perceptions of masculinity in New Zealand, so men have more 'real' conversations and are more likely to seek help when they need it, and ultimately reduce the male suicide rate.

Who is delivering it?

This project was led by Movember in partnership with Gibson Group (production company) and TVNZ (the broadcaster). An Advisory Group and Approval Group oversaw the implementation of the project.

How much funding has been invested?

Thanks to the Distinguished Gentlemen's Fund, Movember was able to invest **NZD \$57,304** from 2017 Campaign proceeds into this project.

SINGAPORE

SINGAPORE

INVESTMENT SUMMARY

Movember allocated a total of **AUD \$7,853** of 2017 Campaign proceeds to **one** project in Singapore:

PROGRAM FOCUS	PROGRAM TYPE	PROJECT NAME	FUNDING AMOUNT (AUD)
Prostate Cancer	Survivorship	Prostate Cancer Specialist Nurses	\$7,853

PROSTATE CANCER SURVIVORSHIP

PROSTATE CANCER SPECIALIST NURSES

The purpose of the program is to ensure that prostate cancer patients in healthcare settings are provided with appropriate resources to ensure timely delivery of care, enhance the delivery of optimum care and address their psychosocial needs through community outreach to improve quality of life: Education, Support Groups and Intervention. We aim to achieve this by developing and promoting a prostate cancer Specialist Nurse (hospital-based) that can facilitate optimum care for prostate cancer patients. Through the collaboration between Singapore Cancer Society and the local hospitals, a prostate cancer Specialist Nurse (identified by the respective hospitals) will provide the full continuum of care for prostate cancer patients.

Who is delivering it?

The Singapore Cancer Society manages this project and provides project reports as per agreed indicators annually and at project completion. The pilot program has since been completed with ongoing funding, external to Movember, secured for the nurses.

How much funding has been invested?

Movember has invested **AUD \$7,853** of 2017 Campaign proceeds in Singapore to this project.

UNITED KINGDOM

UNITED KINGDOM

INVESTMENT SUMMARY

Movember has allocated approximately a total of **GBP £407,361** and **EUR €90,719** of 2016 Campaign proceeds to **two** projects in the UK:

PROGRAM FOCUS	PROGRAM TYPE	PROJECT NAME	FUNDING AMOUNT
Prostate Cancer	Biomedical Research	Precision Medicine	£366,625 €90,719
Mental Health	Mental Health & Suicide Prevention	Social Innovators Challenge Program	£40,736

Mental Health	Health Promotion	New Dads Mental Health Program	£108,686.03

PROSTATE CANCER BIOMEDICAL RESEARCH

PRECISION MEDICINE AWARD

Movember has an established partnership with Prostate Cancer UK (PCUK) to support a range of biomedical research projects that could provide breakthroughs in prostate cancer from prevention to treatment and survivorship.

A key element in improving treatment of prostate cancer will be to move away from a blunt, one-size-fits-all approach to selecting treatments for advanced disease to one where treatments are selected based on the characteristics of a man's particular cancer. Large-scale, multi-arm precision medicine trials are already up and running for other cancers and look set to make precision care the standard way of treating those cancers. Although we are beginning to see the first steps towards this in prostate cancer, it still lags behind other cancers.

The Precision Medicine Award seeks to close this gap as quickly as possible because selecting treatments that are matched to a man's prostate cancer will give him more chance of surviving the disease for longer. Personalised care will also reduce the number of men wasting time on treatments that will never work for them and instead focus on giving treatments with the greatest chance of success.

Following an independent peer review process, Dr Gerhardt Attard's STRATOSPHERE project aims to develop a platform that will accelerate the introduction of novel biomarker-treatment pairings for men starting long-term androgen deprivation therapy (ADT) within the STAEMPEDE trial. The team is collecting blocks from the 1,967 men who were randomised between standard of care and standard of care with abiraterone and enzalutamide to undertake genomic, transcriptomic and morphological analyses. Over the next 12 months, the team will complete the planned analysis with publications in peer-reviewed journals.

Who is delivering it?

PCUK manages these projects and provides project reports annually and at project completion.

How much funding has been invested?

Movember invested a total of **GBP £366,625** and **EUR €90,719** from the 2016 Campaign proceeds into this project, with additional **GBP £511,000** funding from Movember campaign proceeds.

GLOBAL CANCER REAL WORLD EVIDENCE NETWORK

How much funding has been invested?

Thanks to the Distinguished Gentlemen's Fund, Movember has been able to invest **GBP £51,141** from the 2020 Campaign proceeds and **GBP £217,372.06** from the 2021 Campaign into this project, details of which are noted above in the International Projects section.

PROSTATE CANCER SURVIVORSHIP

TRUE NORTH DIGITAL HEALTH

How much funding has been invested?

Thanks to the Distinguished Gentlemen's Fund, Movember has been able to invest **GBP £37,972** from 2018 Campaign proceeds and **GBP £200,066** from the 2019 Campaign into this project details of which are noted above.

PROSTATE CANCER CLINICAL QUALITY

TRUENTH GLOBAL REGISTRY

How much funding has been invested?

Thanks to the Distinguished Gentlemen's Fund, Movember has been able to invest **GBP £180,540** from the 2018 DGR Campaign proceeds into this project details of which are noted in the International Projects section above.

IRONMAN - AN INTERNATIONAL REGISTRY FOR MEN WITH ADVANCED PROSTATE CANCER

How much funding has been invested?

Movember invested a total of **GBP £314,563** and **EUR €350,048** from the 2017 Campaign in the United Kingdom and parts of Europe to support this project. An additional **GBP £218,513** from the 2018 campaign, **GBP £100,033** from the 2019 campaign, and **GBP £51,141** from the 2020 Campaign was invested, full details of which are noted in the International Projects section above.

IRONMAN: AN INTERNATIONAL REGISTRY FOR MEN WITH ADVANCED PROSTATE CANCER EMPRO SUB STUDY

How much funding has been invested?

Thanks to the Distinguished Gentlemen's Fund, Movember has been able to invest **GBP £100,033** from 2019 Campaign proceeds, full details of which are noted in the International Projects section above.

MENTAL HEALTH & SUICIDE PREVENTION

SOCIAL INNOVATORS CHALLENGE PROGRAM

Funding from the 2016 Campaign continued to support completion of Phase 2 implementation activities of the following four projects:

- Boxing Futures - ‘Brothers Through Boxing’
- Co-operative & Mutual Solutions Ltd. - ‘Ex-Cell 50+’
- Food Nation - ‘Men’s Pie Club’
- Scottish Association for Mental Health - ‘The Changing Room’

Following assessment by an expert panel, the Movember Board approved further funding for Phase 3 of the SIC and will support the scaling of The Changing Room across Scotland over the next three years. In addition, Movember has approved continued funding for Men’s Pie Club, Brothers Through Boxing and Ex-Cell 50+ are extending their pilot activities which, due to the impact of Covid on project delivery will be completed by July 2022.

Who is delivering it?

Movember manages the SIC program centrally from Canada with support for funded projects in UK.

How much funding has been invested?

Thanks to the Distinguished Gentlemen’s Fund, Movember was able to contribute **£40,736** funding towards completion of Phase 2 piloting activities, implementation, and evaluation activities in the UK from the 2016 campaign.

VETERANS AND FIRST RESPONDERS MENTAL HEALTH GRANT PROGRAM

The following project is being supported in the UK:

ORGANISATION	PROJECT SUMMARY
POLICE SERVICE OF NORTHERN IRELAND PSNI Mental Wellbeing & Trauma Resilience Program	The Police Service of Northern Ireland’s multi-component Mental Wellbeing and Trauma Resilience Program is a wrap-around package of 5 projects aimed to introduce and enhance evidence-based, early intervention and prevention innovation in policing. The first project is psycho-education for new employees and their families, with plans to expand this to all members of the service. The second project seeks to expand upon an established and accredited group of police peer supporters. The third project aims to digitalise and normalise the use of bespoke Wellness and Resiliency Action Plans for all employees. The fourth project is creation of an innovative early intervention system for wellness monitoring using existing Police systems, it is based on programs such as the SafeTNet system used in Victoria Police, Australia. The final project seeks to use peer supporters to deliver an innovative form of Group EMDR. This program has been co-designed by Clinical Psychologists, Police Officers and Police Staff and is based on a medical model of trauma informed care. The ultimate aim of the program is to embed a culture of prevention and early intervention in the Service with a view to improving mental health outcomes for employees, their families and the communities they serve.

Who is delivering it?

Movember manages the VFR program centrally from Canada with support for funded projects in participating markets. Movember’s Monitoring Research and Evaluation team is working with the MHSP team to oversee the evaluation of the program.

How much funding has been invested?

Thanks to the Distinguished Gentlemen’s Fund, Movember has been able to invest **GBP £291,350** from 2018 Campaign proceeds and **GBP £133,377** from 2019 Campaign proceeds into this project, details of which are noted in the International Projects section above.

DIGITAL SOCIAL CONNECTIONS CHALLENGE

The following projects are being supported in the UK:

ORGANISATION	PROJECT SUMMARY
<p>THAT AWFULLY GOOD COMMUNITY INTEREST COMPANY</p> <p>Gamers vs. Depression</p>	<p>This project aims to adopt the basic premise of utilising an intrinsically engaging activity (ie. online gaming) to develop depression literacy (DL) and social connection in adolescent males. The hope is that gaming teams will act as a - social/peer-support group where young men can openly discuss challenges outside of their immediate network in a safe and supportive manner. Two-phased approach to improving depression literacy and help seeking behaviour in young males, which includes the delivery of an intervention consisting of four 1-hour game play streams covering topics on depression, pre and post intervention measures, organised gaming teams and support literature.</p>
<p>FATHERS NETWORK SCOTLAND</p> <p>A Mental Health and Wellbeing App for Men in Scotland</p>	<p>This project will partner with two other charities who directly support men during some of the most stressful times in their lives, with the aim to support many more men through this app. This app would 1) include a function allowing users to anonymously search and contact hundreds of support services using geolocation, 2) provide content to be read, watched, listened to, and 3) provide a peer support chat service. The app will allow those in need of services to access help for themselves and also provide resources for those who are worried about a male friend or relative, directing them as quickly and easily as possible to the services nearest to them and reminding them that they are not alone.</p>
<p>MAATE!</p> <p>Herding Cats</p>	<p>This project is a digital platform to help young men (particularly those not in school, unemployed, or working remotely) maintain social connection by assisting in the organisation of free virtual group activities (ie. trivia, virtual escape rooms and card games, etc.) and taking the hard work out of catching up. The App will organise the event, send out reminders and clear instructions on how to participate, find a new activity every week, and incentivise/gamify team catch ups by rewarding participation through prizes (procured through partnerships/sponsorships).</p>
<p>TARAKI WELLBEING</p> <p>Chai in the City</p>	<p>Taraki is an existing movement that works with Punjabi communities to reshape approaches to mental health. This aim for this project sits with one of their four key workstreams – education and social support – and namely focuses on Punjabi boys and men. The goal is to evaluate and expand their existing program, Chai in the City, which has been running for 18 months and is an open and facilitated discussion and learning group for Punjabi men around mental health, life challenges, and things they may not feel comfortable speaking about freely with their family or friends. The idea is to create a model that can be scaled globally and eventually tailored to particular communities of Punjabi men, including first generation, LGBTQ+, and disabled Punjabi men.</p>

Who is delivering it?

Movember is centrally managing the implementation of the program out of Canada.

How much funding has been invested?

Thanks to the Distinguished Gentlemen’s Fund, Movember has been able to invest **GBP £125,731** from 2017 Campaign proceeds into this project and an additional **GBP £103,795.67** from the 2020 Campaign, details of which are noted above in the International Projects section.

DGR SOCIAL CONNECTIONS CHALLENGE

The following **three** projects from UK are currently piloting their ideas in Phase 2 of the DGR Social Connections Challenge:

- **Quay Rider** is a mentorship initiative based at the motorcycle workshop in Poole, Dorset. The project aims to connect older men with younger men who are living in care. Participants will learn how to build and modify a motorcycle, on which the younger riders will undertake a series of off-road challenges under the guidance of their mentors.
- **Bike Directory** is an online platform for riders in their middle years, looking for places to socially interact with others. The team will use social media to inform the community, many of whom are men who are hard to reach, about upcoming events and report past events.
- **Project Pit Stop** encourages motorcyclists to socialise with each other, strengthening existing relationships or developing new ones. It also uses a 'health by stealth' approach, providing mental health services and mental health literacy alongside practical bike maintenance tips.

Following external panel review of pilot project plans to test ideas produced from Phase 1, all three projects are continuing to pilot their idea in Phase 2 of the DGR Social Connections Challenge:

Who is delivering it?

Movember is centrally managing the implementation and evaluation elements of the program out of Canada.

How much funding has been invested?

Thanks to the Distinguished Gentlemen's Fund, Movember has been able to invest **GBP £133,377** from the 2019 Campaign and **GBP £108,686.03** from 2021 Campaign proceeds into this project, details of which are noted in the International Projects section above.

MEN BUILDING BETTER RELATIONSHIPS

How much funding has been invested?

Thanks to the Distinguished Gentlemen's Fund, Movember has been able to invest **GBP £102,283** from 2020 Campaign proceeds into this project, details of which are noted in the International Projects section above.

NEW DADS MENTAL HEALTH PROGRAM

How much funding has been invested?

Thanks to the Distinguished Gentlemen's Fund, Movember has been able to invest **GBP £108,686.03** from 2021 Campaign proceeds into this project, details of which are noted in the International Projects section above.

IRELAND

IRELAND

INVESTMENT SUMMARY

Movember has allocated a total of **EUR €7,784** from 2018 Campaign proceeds to **one** project in Ireland:

PROGRAM FOCUS	PROGRAM TYPE	PROJECT NAME	FUNDING AMOUNT (EUR)
Mental Health	Mental Health & Suicide Prevention	Veterans & First Responders Mental Health Grant Program	€8,615

Movember has allocated approximately a total of **EUR €24,944.04** of 2021 Campaign proceeds to **one** project in Ireland:

PROGRAM FOCUS	PROGRAM TYPE	PROJECT NAME	FUNDING AMOUNT (EUR)
Prostate Cancer	Biomedical Research / Clinical Quality / Survivorship	Global Cancer Real World Evidence Network	€24,944.04

MENTAL HEALTH & SUICIDE PREVENTION

VETERANS & FIRST RESPONDERS MENTAL HEALTH GRANT PROGRAM

The following project is being implemented in Ireland:

ORGANISATION	PROJECT SUMMARY
ROYAL COLLEGE OF SURGEONS IN IRELAND (RCSI) SAFER Families / Friends	First responders deal with stressful events as part of their daily activities. Public service in times of extreme need is one key purpose of their professions. Extreme situations can be distressing and difficult for individuals to process. Early intervention approaches reduce symptoms of post-traumatic stress, but access to support services remains limited due to lack of resources or the stigma associated with seeking help. Social support has been proven to help combat the after-effects of these stressful events and first responders often lean on their colleagues or their families for this support. This study aims to explore if family members can be trained to 1) recognise the signs and symptoms of stress in their first responder, and 2) provide a basic helpful intervention to manage that crisis. We will link family members to the relevant organisational supports for further assistance, if required.

Who is delivering it?

Movember manages the VFR program centrally from Canada with support for funded projects in participating markets. Movember’s Monitoring Research and Evaluation team is working with the MHSP team to oversee the evaluation of the program.

How much funding has been invested?

Thanks to the Distinguished Gentlemen’s Fund, Movember has been able to invest **€7,784** from 2018 Campaign proceeds and **€8,615** from 2019 Campaign proceeds into this project, details of which are noted in the International Projects section above.

GLOBAL CANCER REAL WORLD EVIDENCE NETWORK

How much funding has been invested?

Thanks to the Distinguished Gentlemen’s Fund, Movember has been able to invest **EUR €24,944.04** from the 2021 Campaign proceeds into this project, details of which are noted in the International Projects sections above.

UNITED STATES OF AMERICA

UNITED STATES OF AMERICA

INVESTMENT SUMMARY

Movember allocated a total of **USD \$858,790** of 2016 Campaign proceeds to **three** projects in the US:

PROGRAM FOCUS	PROGRAM TYPE	PROJECT NAME	FUNDING AMOUNT (USD)
Prostate Cancer	Biomedical Research	Movember - DGR Challenge Award	\$687,032
Prostate Cancer	Survivorship	True North US Program	\$85,879
Mental Health	Suicide Prevention	Making Connections Program	\$85,879

Movember allocated a total of **USD \$1,002,335** of 2017 Campaign proceeds to **three** projects in the US:

PROGRAM FOCUS	PROGRAM TYPE	PROJECT NAME	FUNDING AMOUNT (USD)
Prostate Cancer	Biomedical Research	Movember – DGR Challenge Award	\$503,205
Prostate Cancer	Survivorship	True North Sexual Health Project	\$193,540
Mental Health	Suicide Prevention	Making Connections Program	\$305,590

Movember allocated a total of **USD \$1,522,566** of 2018 Campaign proceeds to **five** projects in the US:

PROGRAM FOCUS	PROGRAM TYPE	PROJECT NAME	FUNDING AMOUNT (USD)
Prostate Cancer	Biomedical Research	Movember – DGR Challenge Award	\$422,067
Prostate Cancer	Survivorship	True North Digital Health	\$422,067

INVESTMENT SUMMARY, CONTINUED

Movember allocated a total of **USD \$1,460,336** of 2019 Campaign proceeds to **four** projects in the US:

PROGRAM FOCUS	PROGRAM TYPE	PROJECT NAME	FUNDING AMOUNT (USD)
Prostate Cancer	Biomedical Research	Movember – DGR Challenge Award	\$438,101
Prostate Cancer	Survivorship	True North Digital Health	\$438,101
Mental Health	Suicide Prevention	Making Connections Program	\$292,067
Mental Health	Suicide Prevention	DGR Social Connections Challenge	\$292,067

Movember allocated a total of **USD \$684,142** of 2020 Campaign proceeds to **three** projects in the US:

PROGRAM FOCUS	PROGRAM TYPE	PROJECT NAME	FUNDING AMOUNT (USD)
Prostate Cancer	Biomedical Research	Movember – DGR Challenge Award	\$171,036
Prostate Cancer	Clinical Quality	IRONMAN - International Registry for Men with Advanced Prostate Cancer EMPRO Sub Study (formerly PROMs Alert Sub Study)	\$171,036
Mental Health	Health Promotion	Men Building Better Relationships	\$342,071

Movember allocated a total of **USD \$1,043,875.43** of 2021 Campaign proceeds to **three** projects in the US:

PROGRAM FOCUS	PROGRAM TYPE	PROJECT NAME	FUNDING AMOUNT (USD)
Prostate Cancer	Biomedical Research / Clinical Quality / Survivorship	Global Cancer Real World Evidence Network	\$524,298.75
Mental Health	Mental Health & Suicide Prevention	Veterans & First Responders Mental Health Grant Program	\$315,523.67
Mental Health	Health Promotion	New Dads Mental Health Program	\$208,775.09

PROSTATE CANCER BIOMEDICAL RESEARCH

MOVEMBER – DGR CHALLENGE AWARD

The Movember - DGR Challenge Award funds large-scale, transformational prostate cancer research projects with a focus on “first in field” discoveries that have a high probability of reducing the chances of death and suffering due to recurrent advanced prostate cancer.

Movember allocated USD \$687,032 from the 2016 Campaign, to support Dr. Douglas McNeel’s 2017 Movember - DGR Challenge Award

Treatments that activate the immune system to target cancer are a promising new way of treating men with prostate cancer. Dr McNeel’s project built on previous work on combining a DNA vaccine with a PD-1 blockade and planned to initiate a clinical trial that examined whether pTVG-HP DNA vaccine with or without pTVG-AR DNA vaccine when given together with pembrolizumab, will be an effective new therapy for men with metastatic, castration-resistant prostate cancer.

The trial is currently open for recruitment at the Washington University Siteman Cancer Center and the University of Wisconsin Carbone Cancer Center, with a total of 60 men to be recruited by December 2022.

Movember allocated USD \$500,000 from the 2017 Campaign to support Dr Susan Halabi’s 2018 Movember - DGR Challenge Award

Metastatic, hormone-sensitive prostate cancer (mHSPC) is currently an incurable and lethal form of prostate cancer for which new treatments are urgently needed. The difficulty in treating men with mHSPC lies not only in heterogeneity of the disease, but also in the spectrum of patients who have it. Understanding heterogeneity should lead to better risk stratification, tailored treatment strategies, and improved outcomes for men with mHSPC. This project will assess a range of parameters (intermediate clinical endpoints; ICEs) to determine if they are suitable as surrogates for OS in men with mHSPC. This will reduce the time it takes to conduct clinical trials and encourage pharmaceutical companies to develop new drugs for patients. The project began in August 2018 and have received a total of 3,795 individual patient data from five clinical trials to compute the endpoints, with ongoing development of the program to perform the analysis.

Movember allocated a total of USD \$425,536 from Campaigns (USD \$3,205 from the 2017 Campaign and USD \$422,331 from the 2018 Campaign) to support Dr Charles Drake’s 2019 Movember – DGR Challenge Award

New strategies are needed to harness the power of the immune system as an effective treatment for men with prostate cancer. Dr Drake and his team plans to initiate a first-in-prostate cancer clinical trial combining a well-tolerated and effective IL-8 blocking antibody with an anti-PD-1 drug for men with castration-sensitive prostate cancer.

The phase I/II trial is currently recruiting across three sites in US (Weill Cornell Medical Center, Columbia University Medical Center and Sidney Kimmel Cancer Center) and is expected to complete the study in August 2023.

Movember allocated USD \$269,169 from the 2019 Campaign to support Dr Phuoc Tran’s 2020 Movember – DGR Challenge Award

Oligometastatic prostate cancer is an advanced disease state in which men have fewer than five sites of metastasis but are still thought to be potentially curable. Results from Dr Tran’s previous research have demonstrated that targeting sites of oligometastatic prostate cancer with stereotactic ablative radiation (SABR), a highly focused form of radiation therapy, is feasible and prolongs progression-free survival. However, it cannot fully eliminate the disease in most men due to outgrowth of tumour deposits that were too small to be detected by molecular imaging at the beginning of the treatment. In this project, the team will analyse samples from men participating in two trials (RAVENs and BLUE JAE), which combine SABR with other systemic radioactive treatment to improve outcomes of men with oligometastatic disease, to investigate whether the levels of circulating tumour cells and circulating tumour DNA are associated with patient outcomes.

The project commenced in late 2020 and the research result will be available in late 2022.

Movember allocated USD \$208,228 from the 2019 Campaign to support Dr Arul Chinnaiyan’s 2020 Movember – DGR Challenge Award

Dr Chinnaiyan and his team will investigate how two recently discovered gene mutations called SMARCA2 and SMRCA4 drive disease progression in metastatic, castration resistant prostate cancer (mCRPC). They will search for biomarkers that can be used to identify men who are more likely to benefit from treatment with SMARCA2/4 degraders. If successful, the team will initiate a phase 1/2 clinical trial to test the safety and efficacy of the SMARCA2/4 degraders alone and in combination with enzalutamide in men with mCRPC.

The project commenced in late 2020 and the research result will be available in late 2022.

Movember allocated USD \$171,036 from the 2020 Campaign to support Dr Matthew Freedman’s 2020 Movember – DGR Challenge Award

Epigenetic is the study of non-genetic elements that regulate gene transcription, which can provide valuable insights to understand cancer development. Dr Freedman and his team aims to investigate the epigenetic landscape at three different phases of resistance that occur during the treatment of prostate cancer - at the development of castration resistance, resistance to AR-targeted therapy and neuroendocrine disease – in order to discover targetable vulnerabilities that can be leveraged for the development of new treatments.

The project commenced in late 2021 and the research result will be available in late 2023.

Who is delivering it?

The Prostate Cancer Foundation (PCF) manages these projects and provides project reports as per agreed indicators annually and at project completion.

How much funding has been invested?

Movember has provided a total of **USD \$2,271,001** from 2016, 2017, 2018 2019 and 2020 Campaign proceeds to support six Movember – DGR Challenge Awards.

GLOBAL CANCER REAL WORLD EVIDENCE NETWORK

How much funding has been invested?

Thanks to the Distinguished Gentlemen’s Fund, Movember has been able to invest **USD \$524,298.75** from 2021 Campaign proceeds into this project, details of which are noted above in the International Projects section.

PROSTATE CANCER SURVIVORSHIP

TRUE NORTH US

The aim of the True North US (formerly TrueNTH) program is to improve the physical and mental wellbeing of men living with and beyond prostate cancer, together with their partners, caregivers and families.

It is a national collaborative network established among 15 leading institutions to design and implement solutions via an open website. If successful, these solutions will be scaled across the US.

True North US has a number of prostate cancer care programs for men, their loved ones and healthcare providers: All studies have come to completion with the True North US website being integrated into the global True North website.

PROGRAM COMPONENT	PURPOSE	STATUS
General Information and Introduction to True North	To provide general information on prostate cancer and the purpose of True North	The website is available to all men living with prostate cancer and has now been integrated into https://truenorth.movember.com/
Symptom Tracker	To support self-management of patient-reported outcomes	The tool was made available throughout the pilot. The pilot phase concluded in December 2019.
Decision Support	To prepare men for the process of selecting a treatment path	The tool was made available through the previous TrueNTH USA website and reached over 1,150 men. Access to the tool ended in 2021 upon decommission of https://us.truenth.org and prior to the launch of the new True North site (https://truenorth.movember.com/).
Community of Wellness	To promote positive lifestyle changes through exercise and diet	The study enrolled 207 men and concluded in 2019.
Sexual Recovery	To provide support for sexual rehabilitation for men and their partners	This study concluded in April 2019.
Care Plan and Navigation	To assist navigation of survivorship issues for men receiving Androgen Deprivation Therapy	This study concluded enrolment in December 2019 and collected follow-up data until June 2020.

Who is delivering it?

Movember managed this program in collaboration with 15 leading institutions across the US. The website <https://truenorth.movember.com/> is managed by Movember.

How much funding has been invested?

Thanks to the Distinguished Gentlemen’s Fund, Movember has invested **USD \$85,879** into this program from the 2016 Campaign.

PROSTATE CANCER CLINICAL QUALITY

TRUE NORTH GLOBAL REGISTRY

Thanks to the Distinguished Gentlemen's Fund, Movember has been able to invest **USD \$57,838** from 2018 Campaign proceeds into this project, details of which are noted in the International Projects section above.

IRONMAN - AN INTERNATIONAL REGISTRY FOR MEN WITH ADVANCED PROSTATE CANCER

Thanks to the Distinguished Gentlemen's Fund, Movember has been able to invest **USD \$57,838** from 2018 Campaign proceeds into this project, details of which are noted in the International Projects section above.

IRONMAN: AN INTERNATIONAL REGISTRY FOR MEN WITH ADVANCED PROSTATE CANCER EMPRO SUB STUDY

How much funding has been invested?

Thanks to the Distinguished Gentlemen's Fund, Movember has been able to invest **USD \$171,036** from 2020 Campaign proceeds, full details of which are noted in the International Projects section above.

MENTAL HEALTH & SUICIDE PREVENTION

MAKING CONNECTIONS PROGRAM

Making Connections is a US-wide program focused on identifying new ways of improving the mental health and wellbeing of high-need population including men and boys of colour and members of the military, veterans and their families. Following the completion of the project in 2019, Movember selected five of the most promising projects to continue funding for the next 18 months. Funds from the 2019 DGR ride were primarily used for the Resilience Grows Here, a community-run wellbeing and suicide prevention program aimed at military veterans and their families, at Canton/Farmington Valley in Connecticut.

Who is delivering it?

Movember works with the Prevention Institute to manage and deliver this program across the US.

How much funding has been invested?

Thanks to the Distinguished Gentlemen's Fund, Movember has allocated **USD \$85,879** from the 2016 campaign, **USD \$305,590** from the 2017 Campaign, **USD \$562,756** from the 2018 Campaign, and **USD \$292,067** from the 2019 Campaign toward the implementation phase of the program.

DGR SOCIAL CONNECTIONS CHALLENGE

The following four projects from the US were selected to take part in the first phase of the DGR Social Connections Challenge:

- **Motorcycle Therapy** targets middle-aged motorcycle riders from any branch of the armed services who are in active duty, retired or veterans. The program aims to open up opportunities to experience different types of motorbiking without the risk of financial commitment. Small build groups encourage natural friendships to form along with riding activities to encourage and promote participants' ability to tackle their personal problems.
- **BIKEMEETS.com** aims to create a motorcycle map to connect riders, between the ages of 25-35, with local events, destinations and riding buddies. Many riders leave and come back to the hobby, move to a new city, or simply struggle with the social anxieties to connect with other local enthusiasts. The goal is to break down those barriers to entry and help riders plug into the thriving moto communities in their own backyards.
- **The Turn** is aimed at male riders of all ages and will engage with the NYC motorcycle community to provide a year-round program that focuses on fostering community and tackling mental health issues.
- **The Ride 2 Wise** series of short films aims to address the ways in which men communicate and share personal stories, allowing them to be vulnerable in a setting that is familiar to them. Older bikers have life experience to share with younger riders and it is hoped that the films will lead to transformational conversations, build relationships and strengthen social connections.

How much funding has been invested?

Thanks to the Distinguished Gentlemen's Fund, Movember has allocated **USD \$292,067** from the 2019 Campaign to fund the project, details of which are noted in the International Projects section above.

MEN BUILDING BETTER RELATIONSHIPS

How much funding has been invested?

Thanks to the Distinguished Gentlemen's Fund, Movember has been able to invest **USD \$342,071** from 2020 Campaign proceeds into this project, details of which are noted in the International Projects section above.

VETERANS AND FIRST RESPONDERS MENTAL HEALTH GRANT PROGRAM

The following project is being implemented in the US:

ORGANISATION	PROJECT SUMMARY
<p>SOUTHCENTRAL FOUNDATION</p> <p>Southcentral Foundation Soldiers Heart Program</p>	<p>Southcentral Foundation’s Soldier’s Heart Training is an innovative, unique and comprehensive post-traumatic stress training. It uses evidenced-based approaches designed for veterans, first responders and law enforcement who have experienced trauma through combat or service-related encounters. The need is great, as one in three communities in Alaska have no local law enforcement, with many reachable only by boat, plane or snow machine. Within these isolated communities, typically the first responder will have no back up and little training to deal with some of the highest rates of poverty, sexual assault and suicide in the United States. The goals of the program are to:</p> <ol style="list-style-type: none"> 1. Reduce the effects of PTS among first responders and law enforcement in rural and urban areas of Alaska 2. Aide in suicide prevention through a community of peer support and understanding 3. Address the culture of silence and stigma related to first responder PTS by bringing the program to other organizations
<p>FIRST RESPONDER CENTER FOR EXCELLENCE</p> <p>Enhanced Stress First Aid</p>	<p>Behavioral health has been an emerging issue in the American fire service across the past two decades. Stress First Aid is a basic but comprehensive approach to embedded peer support specifically derived from the US Navy/Marine Corps Combat and Operations Stress cooperation with the National Center for Post-Traumatic Stress Disorder (an arm of the Veterans Administration). This project seeks to expand upon initial success by developing and implementing a more accessible and cost-effective web-based delivery platform as well as update content, and to specifically include modules to assist in identifying and addressing suicidal ideation based on an adaptation of the US Army’s ACE model. The project will also include specific elements to support dissemination and assistance with adoption and implementation at the local level.</p>

Who is delivering it?

Movember manages the VFR program centrally from Canada with support for funded projects in participating markets. Movember’s Monitoring Research and Evaluation team is working with the MHSP team to oversee the evaluation of the program.

How much funding has been invested?

Thanks to the Distinguished Gentlemen’s Fund, Movember has been able to invest **USD \$315,523.67** from 2021 Campaign proceeds into this project, details of which are noted in the International Projects section above.

NEW DADS MENTAL HEALTH PROGRAM

How much funding has been invested?

Thanks to the Distinguished Gentlemen’s Fund, Movember has been able to invest **USD \$208,775.09** from 2021 Campaign proceeds into this project, details of which are noted in the International Projects section above.
